

## TEAM BICYCLE BUILD OFF

THE BICYCLE BUILD OFF: Bike building teambuilding events -  
Build a bike... Change a child's life

Each of the bicycles your team builds will be given to an underprivileged child in your community.

The Bicycle Build Off is a unique team building workshop and powerful team philanthropy experience which can be customized to meet all of your team goals.

Each member of your team will help build a bike that will change the life of a child. This bicycle building experience will touch your hearts and inspire your minds. It is filled with fun and excitement, as well as skills, tools and experiences that will make a dramatic & powerful impact on your team. After an initial opening ceremony, briefing and orientation, your team will participate in a series of custom problem-solving activities during which you will learn and practice powerful new skills. After each activity, your team is rewarded with the parts to a brand new bicycle and the tools to build that bike for your "customers". Your "customers" are local underprivileged children to whom your team will present the bicycles-- though neither your team members nor the children are aware you are about to share an extraordinary experience together (so

Please, DO NOT TELL YOUR TEAM about the bike building or the donation of the bikes to the kids before your event).

Through participation in The Bicycle Build Off experience, your team will gain a stronger feeling of team connection and more powerful motivation to achieve personal and team goals. You will also learn and master powerful tools & techniques that will translate into improved teamwork, better communication, and increased productivity.

This event is non-strenuous and can be performed indoors and outdoors, group size and break up can be determined on the day and is done by SA Teambuilding
